3D edgeband from Doellken.

**DÖLLKEN**

KUNSTSTOFFVERARBEITUNG

A SURTECO COMPANY

Thermoplastic edgebands from Doellken set the global trends in quality and design. With its unique, patented innovation, the 3D edgeband, Doellken offers new creative ideas for modern furniture design.

Due to unique manufacturing technology, the 3D edgeband is convincing with its outstanding new colour brilliance and an impressive, three-dimensional depth effect. The 3D edgeband transforms any piece of furniture into a sophisticated object of design.

Whether used in the kitchen, bathroom, living room or at the office, the 3D edgeband ensures a much more creative and classy look. Used on the front, carcass, table- and work-top, the 3D edgeband offers numerous applications to ensure design-oriented accents.

3D

Design that opens up new perspectives.

Design that sets standards.

3D

### **3D edgeband: Perfection to the last detail**

The unique nature of Doellken's 3D edgeband offers brilliant optical effects. The finishes applied to the reverse side behind a transparent acrylic layer are of exceptional print quality and are completely preserved even in milled areas. This allows for a harmonic transition to the board without any joint. Additionally, the transparent supporting material optimally protects the finishes from damage, which might occur during processing, transport and assembly. Even scratches occurring at a later point in time can be polished away with ease. As a result, this high-quality design leaves a lasting visibly good impression.

# 3D

Design that attracts your attention.

### **3D edgeband: A special kind of depth effect**

Only with the 3D effect can brilliant finishes display their true excellence. It is this edgeband in particular, used as a contrast to the surface that assigns the furniture a distinctive character.

Current trends are constantly being set and further developed with the 3D edgeband, which can especially be seen in the rich selection of metallic finishes. Outstanding brilliance paired with clear lines – with its unique spatial depth effect and smooth elegance, the 3D edgeband's aesthetics always cause a stir.

Design that radiates quality.

3D

### **3D edgeband: A highlight for the highest of demands**

The advantages of the impressive optical effects and outstanding technical quality are built into the Doellken 3D edgebands, thus making it a truly unique product. According to the individual design demands, the 3D edgeband is available in every desired degree of gloss – from matt to high-gloss.

In the current combination of high-gloss fronts and high-gloss edgebands, the 3D edgeband is impressive with its precise harmony regarding the finish and gloss effect. This allows high-quality furniture in all living and working areas to really stand out.

Design that gives you freedom.

3D

**3D edgeband: Creative diversity is our motto**

The 3D edgeband from Doellken has a suitable design solution for every application. In addition to the classic colours and wood finishes, special metallic, carbon, multiplex and fantasy finishes offer stylish accents as well as unlimited variation possibilities. The 3D edgeband enables the creation of tonal harmony and effective contrasts in many ways – even for a large range of different board thicknesses and widths. The co-ordination with surface finishes of leading manufacturers and the high number of exclusive and exquisite finishes, such as the iridescent 3D edgeband, offer the perfect foundation for creative design without limitations.

Design that glistens  
throughout the world.
